

Why to organize open days on the CRSTRA ?

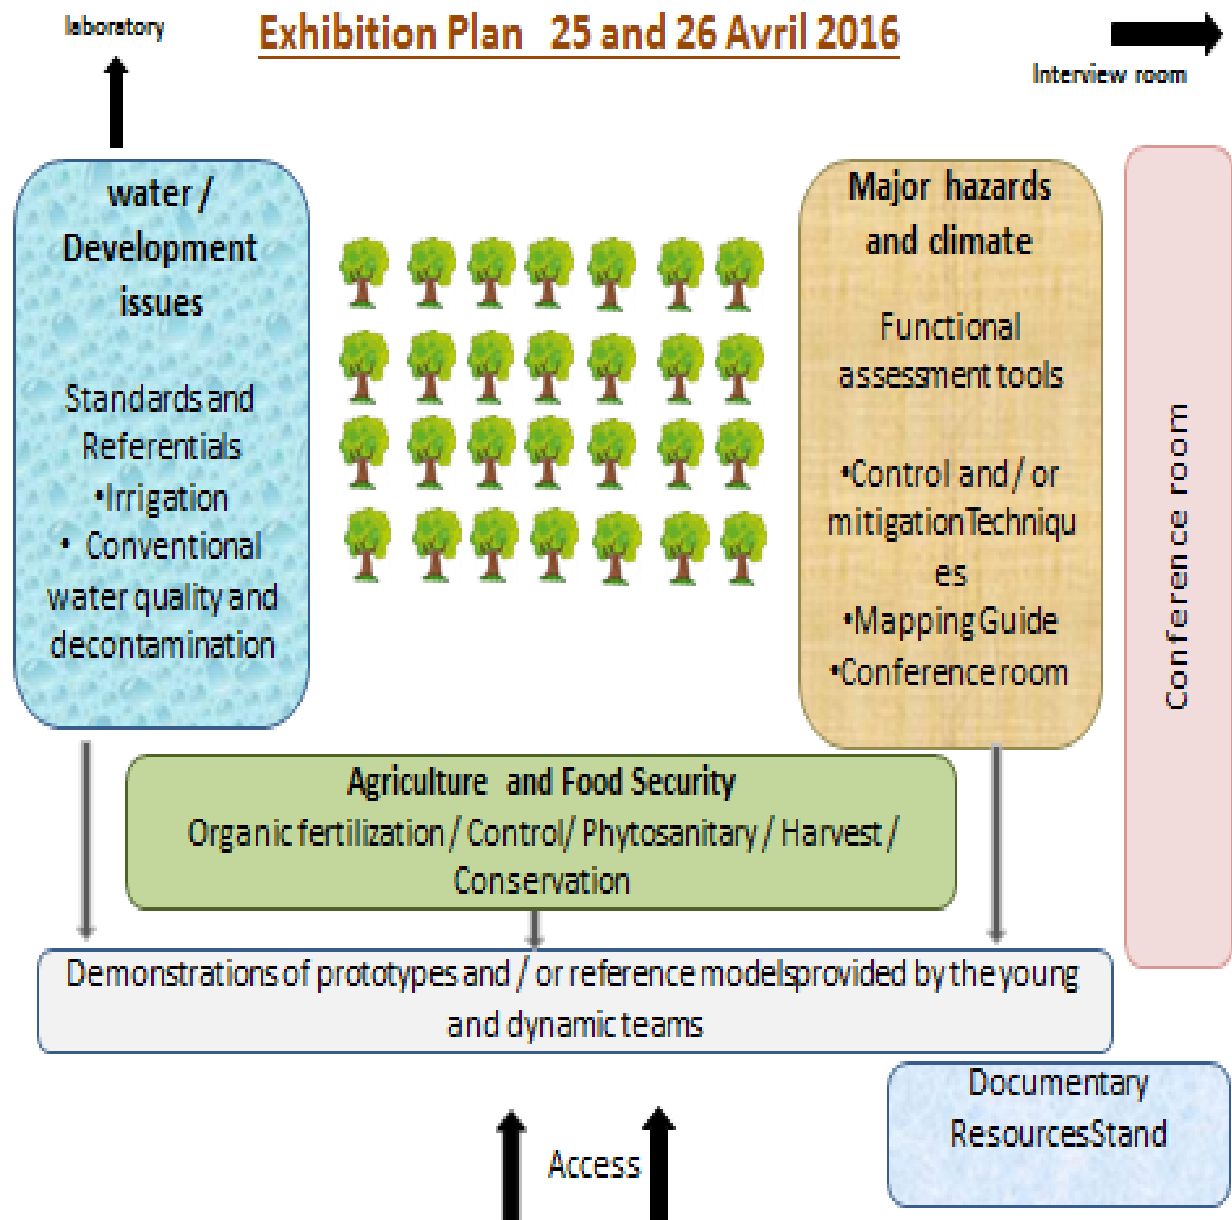

To better know its scientific and technical activities related to the realities and concerns of the stakeholders by presenting:

- Its achievements in terms of knowledge on Arid Regions (Dryland farming-agro-pastoralism, water issues, major climate risks ...);
- The areas of expertise of its human resources;
- The operational and the transfer of its results;
- And especially listening and sharing with the development community in order to reach win-win partnership.

To this end, the crew of the Centre will be there to welcome you and provide you an instructive, diverse and enjoyable visit.

**Come join us between 25 and /or 26 April
2016 !**
